SOJA BEAN

OF EXTRA VALUE FOR STOCK FEEDING.

This variety ripens in Canada. It grows nearly four feet in height, heavily podded, and has yielded over ten tons per acre. It is a very valuable fodder, either for curing, feeding green, or for the silo in mixture with corn. It is a rich, nitrogenous food, is unsurpassed as a flesh former, and, like the Clovers, is a soil improver. Sow broadcast 30 lbs. per acre, or plant in drills, 2 ft. apart, 1 ft. between plants. Lb. 15c., postpaid, 20c.; 10 lbs., \$1.00.

HORSE BEANS

Sow in drills, 30 inches apart, 1½ bush. per acre, in well manured land, early, and if possible, in clay land or heavy loam. Peck, 70c.; bushel, \$2.50.

It is exceedingly nutritious, much more so than clover, is eaten with relish, and may be fed with safety to all kinds of stock. To the acre sow 60 to 80 pounds. Lb., 15c., by mail, 20.; 10 lbs., \$1.00.
